Witches before flying

**Abstract:** This paper examines Shakespeare’s *Macbeth* (1606), and *The Late Lancashire Witches* (1634) by Thomas Heywood and Richard Brome, and considers in detail the witch scenes in both plays and their stage directions during their entrances and exits. The witches in the Jacobean *Macbeth* of the First Folio, do not explicitly fly in the stage directions. However, they do in the Restoration *Macbeth*, namely in Davenant’s second Quarto (1674). The question to be raised here is: what evidence is there in the pre-Restoration *Macbeth* that the witches flew? In order to explore this, we must consider what performance spaces were used for Macbeth in the Jacobean period. Shakespeare’s *Macbeth*, and Heywood and Brome’s *The Late Lancashire Witches* form an interesting comparison since they were both revised by other writers. The *Late Lancashire Witches* has not received as much scholarly attention as the other witch plays discussed here. Therefore, as a comparative study, this paper will also discuss the joint authorship of Heywood and Brome in *The Lancashire Witches* and the stage directions of the witch scenes. Although it seems that the witches did not fly in Heywood’s and Brome’s version, there is evidence that the stage directions called for flight in Thomas Shadwell’s *The Lancashire Witches* (1681). A further illuminating comparison between these plays is that the creatures we are considering here are sinister figures in *Macbeth* but comic figures in *The Lancashire Witches*. The audience can see that the three Weird Sisters enter the stage and then vanish into the air, but do not see them fly.

**Keywords:** Stage Directions in the Jacobean *Macbeth*, Stage Directions in the Restoration *Macbeth*, Stage Directions in Thomas Shadwell’s *The Lancashire Witches*, Tegue O Divelly the Irish-Priest, and Pepys’ Response to *Macbeth* The *Late Lancashire Witches*

1. **Introduction**

This paper examines Shakespeare’s *Macbeth* (1606), and *The Late Lancashire Witches* (1634) by Thomas Heywood and Richard Brome, and considers in detail the witch scenes in both plays and their stage directions during their entrances and exits. The witches in the Jacobean *Macbeth* of the First Folio, do not explicitly fly in the stage directions. However, they do in the Restoration *Macbeth*, namely in Davenant’s second Quarto (1674). The question to be raised here is: what evidence is there in the pre-Restoration *Macbeth* that the witches flew? In order to explore this, we must consider what performance spaces were used for *Macbeth* in the Jacobean period.

Shakespeare’s *Macbeth*, and Heywood and Brome’s *The Late Lancashire Witches* form an interesting comparison since they were both revised by other writers. *The Late Lancashire Witches* has not received as much scholarly attention as the other witch plays discussed here. Therefore, as a comparative study, this paper will also discuss the joint authorship of Heywood and Brome in *The Late Lancashire Witches* and the stage directions of the witch scenes. Although it seems that the witches did not fly in Heywood’s and Brome’s version, there is evidence that the stage directions called for flight in *The Lancashire Witches* (1681), Thomas Shadwell’s later version. A further illuminating comparison between these plays is that the creatures we are considering here are sinister figures in *Macbeth* but comic figures in *The Lancashire Witches*. The audience can see that the three Weird Sisters enter the stage and then vanish into the air, but do not see them fly.

2. **Shakespeare’s *Macbeth***

*The Tragedy of Macbeth* comes sixth in the list of Tragedies in Shakespeare’s First Folio. The text of *Macbeth*
was taken from a prompt-book, and it was not entered in the stationers’ books, nor printed, until 1623.2 St Clair suggests that it was due to their representation of political usurpation that ‘Antony and Cleopatra, Julius Caesar and Macbeth’ were among the Shakespearian plays that were not printed in Shakespeare’s life time.3 Macbeth consists of five acts, and presents a similar dramatic progression to Shakespeare’s other tragedies. The tension rises in the first half of the play (Act 2), reaching a climax in Act 3 before falling in the second half with the hero’s declining power (Act 4), finally ending with the downfall of the hero in Macbeth’s death (Act 5).

The supernatural characters, which are discussed in this chapter, are the Three Sisters, Hecate and the other witches. The three Weird Sisters have a major role in the play, but not Hecate and her fellow witches. The focus here is on the witches’ activities and their influence upon the non-supernatural characters in the play. The chapter examines the way they enter and exit the stage both before and after the Hecate additions which were appended to Macbeth. Furthermore, it explores whether the Hecate scene was written by Shakespeare or whether it was interpolated into Macbeth by someone other than Shakespeare on the occasion of a theatrical revival.

3. Early Performances of Macbeth

We know that Macbeth was first performed between 1605 and 1606, two years after the accession of King James I, when there was a great demand for new entertainment involving witches among the theatregoers.4 The accession of King James made Shakespeare’s Macbeth ‘commercially viable and creatively attractive’, and because of the plague in 1606 (which had closed the theatres) and economic necessity, may have led the King’s Men to present Macbeth at Court first.5 Macbeth was also performed at the Globe on the 20th of April, 1611; Dr Simon Forman recorded one spectacular effect that does not appear in the extant text (Act 1, scene 3):

In Macbeth at the Glob, 16jo, the 20 of Aprill [Sat.] there was to be obserued, first, how Mackbeth and Bancko,

1 noble man of Scotland, Ridinge thorow a wood, the[fr] stode before them 3 women feiries or Nymphes (...)6

‘Riding’ on horseback, as noted by Dessen and Thomson, ‘occurs in plays performed at the Globe, before Aalarum for London and after The Late Lancashire Witches and the original performance of Macbeth’.7 Forman only recorded three witches, did not mention Hecate and gave no reference to flying. Forman calls them ‘feiries or Nymphes’, which is significantly different. It suggests that their costume was not necessarily Hag-like, whatever Macbeth’s words suggest. The audience may have amused by the visual spectacle of the witches since they are not sinister figures, and their gender is recognizably female and had a feminine appearance. Nosworthy argues that the three Sisters turned into ‘secret, black & midnight hags’ with choppy fingers, skinny lips and beards’ in 1612 under the influence of the Court Masque.8 According to Nosworthy, there is not only a revision in the presentation of the three Sisters in 1612 but Shakespeare also added the figure of Hecate, (Act 1, scene 3, 43-7) as it was (Act 4, scene 1, 48-9) if that scene figured at all in the original.9 The Hecate scene and the two songs were probably inserted into the Folio text of Macbeth after the King’s Men performed The Witch at the Blackfriars and employed instrumentalists to provided musical intermissions before and during performances.10 That said, Shakespeare’s original trio of witches did not fly.11 Nosworthy also argues that there is a certain correspondence between Shakespeare’s and Middleton’s use of magical ingredients which belongs to Shakespeare’s revision of 1612 in which Shakespeare wanted to convert Macbeth into a tragedy of spectacle.12 Nosworthy does not account for Shakespeare having retired to Stratford-upon-Avon in 1611, some years before his death. His dramatic career was over, and his last play The Tempest was written in the same year. It is likely that Shakespeare himself did not have a hand in inserting the Hecate scenes into the Folio text of Macbeth.

Although Nosworthy’s opinion on Hecate’s interpolation in Macbeth is different from other contemporary scholars, he believes that Middleton had no hand in Macbeth and that Shakespeare is the sole author and reviser, the purpose of
his revision, being ‘to make the play conformable to the newly prevalent taste for spectacle and melodrama, as sponsored by Beaumont and Fletcher’. 13 He thinks Macbeth was a result of royal command and a hasty assignment. Fraser criticizes Nosworthy’s belief that Shakespeare wrote Macbeth hastily under the influence of royal command in 1606 while he was preoccupied with Antony and Cleopatra. He revised Macbeth around 1612, and in this revision, the three nymphs or fairies reported by Simon Forman in 1611 turned to three hags, under the influence of Jonson's Masque of Queens and Middleton's The Witch (which also supplied two songs, the flying machine, and the cauldron).14 Smidt agrees with previous scholars that, Shakespeare revised his occasional plays for use at the Globe, 'cutting, augmenting, and altering as required in each case, and that he even originally wrote them with a thrifty view to a double use, private and public’.15 In contrast, Nosworthy as well as his reviewers, Fraser and Smidt, fail to mention that the Middleton material appeared after The Witch was staged around 1616 by which time Shakespeare had retired. At this point he was no longer active in his career to revise his productions. It seems more likely then, Macbeth was revised, for entertainment purposes, not by Shakespeare himself but by the King’s Men Company. As a result, the alterations made to the play, including the addition of the Hecate scenes and the new spectacle of flying witches reflect the cultural climate of a period in which belief in witchcraft was increasing.

There is another potential explanation for these conditions. Anne Lancashire argues that if the added witch songs and dancing come from Middleton’s The Witch, ‘might they not have been interpolated into Macbeth not only for their theatrical effectiveness but also for their political notoriety?’ 16 Lancashire thinks that because of The Witch’s political connections, namely the 1615-16 Overbury murder trials and convictions, the play was suppressed and the King’s Men carried on, ‘keeping the witch scenes in the public eye through use of their songs and dancing in another King’s Men play not without its own political overtones’. 17 However, this political reading ignores the fact that witches were in vogue in the 1610s. Thus, a more straightforward explanation is that the King’s Men wanted to enhance the role of the witches in Shakespeare’s play for entertainment purposes.

As Gary Taylor aptly puts it, the Hecate scenes ‘clearly require efficient and quiet flying machinery’ and ‘such machinery was clearly available at the Blackfriars’. 18 The flight of the witches in the Hecate scenes may not have been staged at the Globe as it was not as well-equipped with flying machinery as Blackfriars. 19 In other words, pre-Blackfriars Macbeth did not have the Hecate scenes, but after the play was adapted, the Hecate scenes were added and then staged at the Blackfriars. After 1608, the plays were artfully contrived to suit the conditions of Blackfriars Theatre.

### 4. The Witch Scenes in Macbeth

The Witches appear in Act 1, scenes 1 & 3, Act 3, scene 5, and Act 4, scene 1. The witches in Macbeth vanish and dispel once they make prophecies to Macbeth and finish casting spells on him (Act 1, scene 3). The question here is why Hecate has been inserted into Macbeth? A likely answer is that Hecate and her crew’s presence on stage offered a kind of magic show, and it may also reflect a taste of the elite Jacobean audience. Briggs points out that witchcraft, ‘is rather decorative than realistic’ in Shakespeare’s Macbeth, Jonson’s The Masque of Queens and Middleton’s The Witch. 20 This may be correct for The Masque of Queens and Macbeth, although not for The Witch, which had political and social ramifications to its witchcraft scenes (as we shall later see). Jonson’s hags are presented with spectacular costumes and effects, and he concentrates more on witches’ festivities. However, Jonson and Shakespeare are somewhat similar in the way they represent their hags ‘primarily through words’ rather than machines or technological effects. Shakespeare uses language to convey their diabolic nature to a greater extent than either Middleton or Jonson do, conjuring up their physical movements through description. When Macbeth

---

17 Ibid., p. 74.

and Banquo speak of them, he uses visual ‘verbs’ to
describe the departure of the witches who ‘hover through
the fog and filthy air’ (I.i.10), ‘vanish into the filthy air’ and
have ‘melted as a breath into the wind’ (I.iii. 78-80).
The sudden disappearance of the witches is suggested
even as the method of their departure is indicated. Their
abrupt vanishing or melting is achieved through one of the
doors into the tiring-house rather than through flying
machinery, i.e. free flight. Macbeth comments on the
sudden departure of the witches to the air when he
converses with Lenox:

LENOX. What’s your Grace’s will?
MACBETH. Saw you the Weyard Sisters?
LENOX. No my Lord
MACBETH. Come they not by you?
LENOX. No indeed my Lord.
MACBETH. Infected be the Ayre whereon they ride
(I.V.149-157)

This line, ‘Come they not by you?”, indicates that the
Weird Sisters depart, not through a trapdoor, but through
one of the doors into the tiring-house, the same door
through which Lenox then enters. This makes sense of why
Macbeth might expect Lenox to see them coming ‘by’ him.

Shakespeare makes use of the theatrical resources at his
disposal. Elsewhere, to dramatize the visual spectacle of the
witches and Hecate, Shakespeare makes use of the heavens.
It seems that the witches in Macbeth are also located in the
heavens since Hecate ‘sits in a foggy cloud’ (III.v.37). ‘A
foggy cloud’ here might possibly mean ‘a theatrical
“machine” that lifted the actor from the stage’.21 However,
this song belongs to the pre-Folio Macbeth before it was
revised. There is no evidence of any kind of smoke
machine in existence before Macbeth was written (1606).
Harris argues that when the spirit summons Hecate in
Macbeth, ‘the flying machinery was concealed in folds of
light drapery, a device that was used extensively in the
masques to achieve such effect’.22 As in traditional Greek
drama, ‘Hecate is taken up in the cloud, i.e. a stage car,
drawn up on pulleys, and concealed by billowing
draperies’,23 in order to intervene in the natural order.

Another suggestion of Harris regarding how Macbeth’s
witches flew is that, ‘the Sisters climbed up stepladders
leading from the yard into which the stage projected’.24
Before the Kings’ Men leased the Blackfriars, the Weird
Sisters probably made their entrances and exits through the
mechanized trapdoor. The mechanical trapdoor is a more
plausible method for the Sisters to ascend and descend
the stage in case no flying devices were available. All the
departures of the witches are accompanied by thunder and
lightning effects, which are used to drown the creaking
sound of the trapdoor as well as masking their descent.

It seems that in the cauldron scene the main trap was
used to raise the three Weird Sisters to gather around the
cauldron. Once the cauldron was removed in the stage,
music was provided in order to disguise the noise of the
mechanized trap:

Why sinks that cauldron, and what noise is this? (IV.i.106)

The Weird Sisters create the Apparitions (demonic spirits)
and summon them. The entrance and departure of the three
apparitions may be through the mechanized trap as well as
the show of the eight kings. However, if Macbeth was
performed at Greenwich or Hampton Court, the Sisters’
entrance may have been made through a curtain similar to
that probably used in the Masque as traps would not have
been available in these performance spaces.25 There was at
least one trap door situated in the main stage in most of
Elizabethan theatres, through which, as Harris notes, actors
and properties could rise and descend by means of a
mechanised structure operated by ropes attached to
windlass. Some of these traps were capable of carrying two
or more actors simultaneously and ascents and descents
could be achieved with considerable rapidity.26

In the Cauldron scene, three apparitions also descend
from the heavens to tell Macbeth about his future. Then
Hecate calls the witches all to dance with music and then
vanish to the air. The ghost also descends after the
alteration is made (see stage directions in the Restoration
Macbeth, p. 64), but in the folio text of Macbeth simply
‘enters’: enter the Ghost of Banquo, and sits in Macbeth’s
place (III.iv)27

The Ghost of Banquo rises at his feet and it seems that
Banquo’s ghost rises on a trap. The three apparitions
possibly also rise up through a stepladder, or trap. The three
weird Sisters and Hecate appear and hover over Macbeth.
These ascents and descents were made through traps in
early performances but they might have been done through
flying on wires at the Blackfriars by the King’s Men with
the help of musical instruments.

27 William Shakespeare, William Shakespeare: Comedies, Histories and
Scholes’s view of the Hecate scene highlights the association between Shakespeare’s use of music and the supernatural. His supernatural entities such as fairies, witches and sometimes ghosts, were especially associated with music. For instance, there is a hidden music when Hecate is summoned in the song ‘Come away’ and the audience does not know where this mysterious music comes from. In the other scene when Hecate orders the witches to sing ‘Black Spirits’, Macbeth appears. In short, through this device of hidden music, Shakespeare produces a sense of the weird and uncanny in the mind of the audience. As Scholes writes, ‘it is music that prepares the mind of the audience for ghostly happenings’, as for example in Julius Caesar. Not only music but also thunder and lightning, Harris states, ‘almost invariably marked the appearances on stage of supernatural phenomena’. Harris is sceptical on the question of whether Macbeth’s witches flew, and argues that ‘although free-flying devices were available in the Banqueting House and other settings for the masques and entertainments, these were almost certainly not installed in any of the public playhouses until after the first performance of Macbeth’. In the first performance of Macbeth at Court and/or the Globe, the witches did not fly, and no Hecate scenes existed in the text. Therefore, no stage directions called for flight of the witches. However, these Hecate materials do appear in the Jacobean Macbeth.

5. Macbeth in the First Folio: Stage Directions in the Jacobean Macbeth

Using few stage directions, Shakespeare gave actors the opportunity to add a personal touch to the play rather than being restrained by authorial directions. According to one recent study of stage directions, Vickers and Dahl argue that ‘dramatists wrote “literary” directions, reflecting the story line, which the company scribe converted into “theatrical” ones’. Dramatists may have sent their plays with their lack of stage directions to the company scribe, but these ‘literary’ directions were altered and transcribed according to the physical characteristics of the playhouse where the performance was to take place. The actors ‘parts’ were already supplied with theatrical stage directions.

I have already discussed how the Hecate materials were added by the King’s Men Company into Macbeth, however what I will investigate here are the stage directions of Hecate and her crew in the Jacobean Macbeth. Albright, noting that Hecate, a new witch, or witch-master, (Act 3, scene 5, and Act 4, scene 1) was spliced into Shakespeare’s Macbeth by someone other than the playwright, points out that in both scenes ‘Hecate is associated with music: the stage directions instruct the witches to perform songs, ‘Come away’ at the end of Act 3, scene 5, and ‘Black Spirits’ at Act 4, scene 1’. However, it is obvious that, as Albright says, these songs can be found in Middleton’s The Witch and in the Davenant version of Macbeth (1663-4, published 1674). Davenant rewrote Macbeth for the Restoration stage, adding new stage directions to the text. Fiske shows the places in the play where Davenant added scenes or made textual alterations to Macbeth. He states that, ‘in a shortened version of Hecate’s speech, several witches descend in a machine and sing “Come away”, after which Hecate gets into the machine and is carried up into the sky’ (Act 3, scene 5). The stage direction, in the First Folio is: ‘Enter Hecate and the other three Witches’ (Act 4, scene 1).

Similarly, in the First Folio, the stage direction of the witches when they meet Hecate is: ‘Thunder. Enter three Witches, meeting Hecate’ (III.v). In another scene the witches again enter (IV.i):

\[\text{Thunder. Enter the three Witches, meeting Hecate.}\]

(First Folio, 142) [37]

34 Ibid., p. 228.
Shortly afterwards, the stage direction about forty lines further on (IV.i.) is:

**Enter Hecate and the other three Witches.**

(First Folio, 144)

The first song of ‘Come away’ in the First Folio is added as (III.v):

38 **Musicke, and a Song.**

**Hecate, I am call’d: my little Spirit see**

**Sits in a Fogy cloud, and flares for me.**

**Sing with me. Come away, come away, &c.**

1. Come, let’s make haste, shee’l soon be backe againe.

(First Folio, 143)

However, the whole song of ‘Come away’ is given in both the Quarto of 1673 and 1674.40 The second song is ‘Black Spirits’ (IV.i)

39 **Musicke and a Song.** **Black Spirits, &c.**

2. By the prickings of my Thumbnails,

**Something wicked this way comes.**

**Open Lockes, who ever knockes.**

(First Folio, 144)

In short, the name of the song is only given in both the First Folio and the Quarto of 1673. However, in the 1674 Quarto, the whole song is given. After the three Apparitions and the show of eight kings, the witches disappear with music (IV.i):

41 **Welcome pay. Musicke.**

**The Witches Dance, and vanish.**

(First Folio, 144)

The same song of the ‘Black Spirits and White’ can be found in both Davenant’s *Macbeth* of the 1673 version and the First Folio of Shakespeare’s *Macbeth*. In both texts, only the first two words of the song are given.43 However, the whole first and second songs are given in Davenant’s 1674 version, (Act 4, scene 1).44 St. Clair has argued that the first Shakespeare texts may have been affected by the intellectual property rights which applied to printed texts until the mid nineteenth century. However, as St. Clair continues, there is no intellectual property right either in manuscript or in performance, such as the singing of a song, the oral delivery of a sermon or lecture, or the performance of a play, even although such performances might have been transmediated from a printed text or from a manuscript.45

Because of the two witch songs in *Macbeth* and *The Witch*, it has been assumed either that *Macbeth* was written by Shakespeare in collaboration with Middleton, or that *Macbeth* was adapted by Middleton or the King’s Men Company. According to St Clair, the fact that only the first line or two of the song was printed in *Macbeth* was due to intellectual property issues; if the whole song was not printed, then it did not infringe upon another person’s intellectual property (copyright law did not exist in the period, but one could still be punished for pirating other people’s published writing). That said, *The Witch’s* songs may have pre-existed both plays. I do not find St. Clair’s argument plausible because the matter here is not about copyright law or breaches another person’s intellectual property, but it is about the physical abilities of the playhouses where both *Macbeth* and *The Witch* were performed. The songs could be only performed successfully at the Blackfriars since it was not only about singing and dancing, but it was about visual spectacle as well, such as flying Hecate with the Spirit and the other witches.

Through the cross-references to both Middletonian songs, Stern argues that *Macbeth* is shorter than any other Shakespearean tragedy which ‘seems to be a cut-down version of a lost, longer text; its reviser may well be Middleton, who was himself a playwright for the King’s Men’.46 It seems that songs were not written directly into the play text during Shakespeare’s time. Stern argues that ‘the pieces of paper on which songs were written were commonly kept outside plays as well as (and sometimes instead of) in them’.47 This means that the written song can be easily lost while the play text survives. However, I do not agree with Stern’s argument since no evidence available in any pre-Jacobean witch plays included these songs. Therefore, Middleton was the pioneer to use these Hecatean songs. Wickham aptly argues that after the successful staging of Middleton’s Hecate scene and the

---

41 William Shakespeare: Comedies, Histories and Tragedies (1623), p. 144. In the Quarto of 1673, the name of the song is only given; William Shakespeare, *Macbeth*: A Tragedy, ed. by William Davenant (London: 1673), pp. 41-42. However, in the 1674 Quarto, the whole song is given; William Shakespeare, *Macbeth*, A Tragedy: with all Alterations, Amendments, Additions, and New Song, p. 42.
songs, this experiment became the standard prompt-copy for all subsequent revivals of the play. Therefore, its spectacular elements such as the songs, the flying machines and the dance were added to fit Macbeth. Moreover, these spectacles were added to the Folio Macbeth by the time when Hemmings and Condell came to publish the First Folio in 1623. This thesis is in agreement with Wickham’s idea that the songs and all the Hecate material were definitely not added by Shakespeare himself as he had already retired by the time Macbeth was revised, but are taken from Middleton’s The Witch and appended to the Folio text of Macbeth by the King’s Men. These witch scenes in Middleton’s The Witch were specially written as a response to the recent scandal of the Somerset family in 1616, making it likely that these songs did not pre-exist in either play, and secondly, that these songs needed a technologically-advanced playhouse in order to stage the flight of Hecate and Malkin during their singing. In short, the stage directions call for a flight in the two songs. Therefore, the pre-Jacobean playhouses were not able to stage these kinds of spectacular elements at that time until the King’s Men possessed the Blackfriars in 1609.

6. Stage Directions in the Restoration Macbeth

The Restoration Macbeth, an adaptation of the play produced by William Davenant probably in 1663-4, revised the Folio text into a tragedy of spectacle. The Restoration Macbeth offers the modern reader an understanding of the age in which it was produced, and about how theatres were used by adapters and company players: how they could increase the number of new patrons and popularity for theatre and the revised plays. After the long-enforced closure during the Civil War, the theatres in London reopened in 1660. Most of Shakespeare’s plays were drastically revised and made to fit the new theatrical conditions of this period. However, while the classical taste always demanded purity of dramatic type, the popular demand was for spectacle. Therefore, opera, which was completely new to England, and masque were the outcome of progressing spectacle in the playhouses in the second half of the seventeenth century. As a result, one can see that both histories of stage spectacle and of theatrical architecture are interlinked.

The revived version of Shakespeare by Davenant was popular at that time due to his addition of music and spectacle in the witches’ scenes. Schafer points out that ‘Davenant worked for the King’s Men in 1630s, and it is thought that he used a playhouse copy of Macbeth as the basis for his adaptation’.48 Davenant died in 1668, and his first Quarto was published in 1673, with the second one following in 1674. Davenant’s Macbeth can be considered as the most well-known of the adaptations as he tried to show the new court and audience of Blackfriars theatre a more up-to-date version of Shakespeare’s plays which met the demand for spectacle.

Wickham argues that ‘Hecate continued to fly, sing and dance throughout the reign of Charles I, for it was upon this nucleus that Sir William D’Avenant [sic], assisted by Henry Purcell, embroidered the next major variation on the original theme’.49 Regarding the two songs, Evans argues that it seems highly probable that Davenant derived them from some earlier prompt-copy of Shakespeare’s Macbeth.50 However, Evans ignores the fact that these songs needed flying machines and a sophisticated playhouse in order to be staged since Hecate and the Cat fly while they are singing. If the full words of the two songs were in any earlier prompt-copy of Shakespeare’s Macbeth, they would have been in the Folio Macbeth as well.

Shakespeare’s Macbeth was acted in a semi-operatic version in 1663, whose ‘flying’ witches proved extremely popular with audiences of that time and afterwards, however this version was not printed until ten years later.51 This version featured goddesses, spirits and witches who intervene in human destiny which were used to rouse pity and terror in the audience. These scenes were conducted with the aid of machines, presenting spectacles when strange wonders were performed, as for instance, when a group of witches were made to fly over the stage under roaring thunder and lightning, and Hecate’s descent in a chariot. Clark argues that, ‘Davenant was obliged by law to revise Shakespeare’s original, whether he wanted or not. But in any case after 1660 Shakespeare’s plays were preferred in adapted versions’.52 Clark also argues that the theatre in 1660 was very different from that of 1642, and that ‘it was not only words and phrases that needed changing for Shakespeare’s texts to satisfy the cultural needs of a new age’.53 This is because in the 1660s and afterwards, witchcraft was used for entertainment purposes and as a subject of pantomime and fantasy, and alterations were made in order to meet with the tastes of the new theatre-goers. Davenant can be considered as a pioneer who initiated the popular lust for spectacle. The change was not only in revision of plays, but the performance space also changed, with performances mostly taking place in the private, indoor, playhouses which were intimate venues with artificial lighting and a prosenium-arch stage.

Different stage directions were written for the entrances

53 Ibid., p. xii.
and exits of the witches in the two quartos. Here, I consider the stage directions in Act 1, scene 1, Act 1, scene 3, Act 3, scene 4 and Act 3, scene 5. In the second Quarto of 1674 the stage direction (Act 1, scene 1) is:

\[ \text{[-Ex. flying.]} \]

(1674 Quarto, 1) 54

However, the stage direction in the 1673 Quarto and the First Folio is:

\[ \text{[Exeunt.]} \]

(1673 Quarto, 1) 55

In the second quarto the three witches also enter the stage flying (I.iii):

\[ \text{Thunder and Lightning. Enter three witches flying.} \]

(1674 Quarto, 3) 56

However, the stage direction in the 1673 quarto and the First Folio states that the witches simply 'enter', not 'flying':

\[ \text{Thunder: Enter the three witches.} \]

(First Folio and 1673 Quarto) 57

In the stage direction in the second quarto the Ghost descends, not simply enters (III.iv)

\[ \text{[The Ghost descends.]} \]

(1674 Quarto, 3) 58

However, the Ghost does not descend either in the quarto of 1673 or the First Folio:

\[ \text{Enter Ghost.} \]

(First Folio and 1673 Quarto) 59

Even more interestingly, the second quarto specifies the following for the flight of the witches in the song of 'Come away' (III.v):

\[ \text{[Machine descends:]} \]

(1674 Quarto, 40) 60

Unlike all the previous stage directions I have discussed, this one explicitly names a ‘machine’. This provides internal proof of the advance of technological abilities in the playhouse in which this play was performed. It is likely that a chariot has been used for their descent. It is clear that Davenant revised Macbeth in the 1674 Quarto and added flying in order to meet with the taste of Restoration theatre-goers, which is almost certainly an interpolation derived from The Witch. 61

Albright argues that Macbeth was beginning to move towards opera as ‘the witches not only want to fly, but also want to sing; they need to push the play into the dimension of music theatre, just as they sail through the unroofed theatre building to the height of the moon.’ 62 He also points out that it is ‘the witches who motivate the opera lurking near the surface of the drama’. 63 Popular demand for a variety of stage spectacle became possible through developing the spaces of theatres as well as adapting new machines and equipment. John Downes, prompter at the Dorset Gardens Theatre, recalls a late-seventeenth century performance of Macbeth (although he does not give the date of this performance):

\[ \text{The Tragedy of Macbeth, alter’d by Sir William Davenant; being drest in all it’s finery, as new Cloath’s, new Scenes, Machines, as flyings for the Witches; with all the Singing and Dancing in it; the first Compos’d by Mr. Lock, the other by Mr. Channell and Mr. Joseph Priest; it being all Excellently perform’d, being in the nature of an Opera, it Recompenc’d double the Expense; it proves still a lasting Play.} \]

64

This important evidence suggests that ‘flyings for the Witches’, like the ‘Clothes’ and ‘Scenes’, are new. It is likely that they flew on a chariot (see fig. 4) rather than by a free-flying wire (see fig. 5). Downes also writes in his description of the production of Shakespeare’s Macbeth that five new plays were acted there before Macbeth’s adaptation by the Duke’s company at the Dorset Gardens. 65 This ‘new and sumptuous house was opened on November 9, 1671’. 66 Dorset Gardens was used for operas

and plays demanding sophisticated staging. In other words, one can say that Dorset Gardens was used as a theatre for popular entertainment; one also notes in this respect Downes’s final point that the play was financially successful.

7. Pepys’ Response to Macbeth

Pepys’s assessment, as a witness in the audience, of Davenant’s version of the play at the Dorset Gardens, provides further important evidence about how audiences responded to the Restoration Macbeth:

[November 5, 1664]: with my wife to the Duke’s house to a play, Macbeth, a pretty good play, but admirably acted.

[7 December 28, 1666]: to the Duke’s house, and there saw Macbeth most excellently acted, and a most excellent play for variety.

[January 7, 1667]: to the Duke’s house, and saw Macbeth, which, though I saw it lately, yet appears a most excellent play in all respects, but especially in divertisement, though it be a deep tragedy; which is a strange perfection in a tragedy, it being most proper here, suitable.

[April 19, 1667]: Here we saw Macbeth, which, though I have seen it often, yet it is one of the best plays for a stage, and variety of dancing and musique that ever I saw.

Pepys praises the play for its being excellent in all respects and for variety, especially in ‘divertisement’. Although Macbeth was a ‘deep tragedy’, clearly it perfectly met the tastes of the Restoration theatre-goers after being adapted in a spectacular fashion. The Hecate additions were in this way a strange presence in a play which was after all a tragedy, but it satisfied the new tastes of the spectators. Davenant presented a pantomime show of Hecate and Malkin to the Restoration audience, and also ‘improved’ Shakespeare’s language through modernization. By the time that Davenant’s Macbeth was performed, belief in witchcraft was not very strong compared to the period when the Jacobean version of the play was staged.

It is obvious that the use of stage entrances and exits of the supernatural characters, of thunder (sometimes with lightning) and music as an accessory of divinity, of the change of scenes, and using ‘machines’, were all characteristics of the Renaissance stage. In general, the techniques of stage scenery and theatrical architecture in England and on the Continent developed from the first half of the seventeenth century onwards. Moreover, the number of theatres also increased in the same period. However, I would argue that a taste for theatrical spectacle developed in the second half of the seventeenth century. One can observe how the stage directions in witchcraft plays tell a narrative of the changing dramatic styles of the seventeenth century. The stage directions in some plays were changed as the technical abilities of the theatres developed and new machines became available, including flying machinery, mechanical trap doors and lighting techniques. More advanced backstage machinery facilitated the movements of the supernatural characters on stage. Stage directions which began as simply ‘enter’ were changed into ‘descend’ in performance because of major changes in the technological progression of the theatre. Theatrical practice informed playbook writing, as scriveners, member of theatre companies and then later modern editors altered stage directions for the supernatural characters to make their exits and entrances.

8. Macbeth: Stage Directions in Modern Editions

The stage directions of the Three Sisters and Hecate in modern editions are to some extent different from the early ones. In the Arden Shakespeare edition, the stage directions of the witches are similar to that of the First Folio, as are the songs. Muir does not change any stage directions and keeps ‘enter’ and ‘Exeunt’ in the entrances and exits of the witches. However, he uses square brackets in signalling the stage directions. Sisson admits that Act 3, scene 5 and Act 4, scene 1 are both interpolations in Macbeth. Hecate descends to and ascends from the stage. The stage directions inserted by Sisson in the first song read:

Thunder. Enter Three Witches. Hecate descends
[Music and a song within. Come away, Come away, &c. Hecate ascends.]
Enter Hecate, with Three Other Witches.

In contrast, only the first line of this song is given in the First Folio. The editions of Rowe, Kittredge and Tyrone Guthrie’s follow that of the First Folio; only the first line of the songs are given and the witches simply ‘enter’. 74

---

67 Downes, Roscius Anglicanus, p.42.
69 Quoted in Spencer, ‘D’avenant’s Macbeth and Shakespeare’s’, p. 621.
73 Ibid., p. 986.
However, the whole songs are given in Wells and Taylor’s edition. The stage direction in the first song is exactly as in The Witch. Wells and Taylor put in the same stage direction here because they believe that these songs belong to Middleton and they consider him as the co-author of the Folio Macbeth:

[Spirits appear above.] *A spirit like a Cat descends*

After Hecate anoints the Cat, ‘she ascends with the Spirit and sings’. By the end of the song, the stage direction reads ‘Exeunt into the heavens the Spirit like a Cat and Hecate’.75 In Bell’s edition, only the whole first song is given but not the second one. The stage direction before Hecate ascends to the heavens reads:

[symphony, whilst Hecate places herself in the machine.76

However, some editions print the whole songs as in the second quarto of Davenant. For instance, in Charles Kean’s and Wells’s and Taylor’s editions, the stage directions are similar to that of The Witch when the Spirit like a cat descends and then ascends back to the heavens with Hecate.77 This shows how modern editors have adapted the Folio text, and the effects of their decision in expanding the text are to show more of the visual spectacle of the witches on stage. The witch scenes, after being adapted, operate more for comic or satirical purposes and were designed to satisfy the tastes of the audience. Each one of *The Witch, The Masque of Queens* and the Restoration Macbeth were performed more often during the Royal occasions.

There are several plays thought to have been adapted by Thomas Middleton in the Folio, including *Macbeth* and *Measure for Measure*.78 Timon of Athens is also considered to be a collaboration between Middleton and Shakespeare. It has also been argued recently that Middleton either adapted or had a hand in Shakespeare’s *All’s Well That Ends Well*. Laurie Maguire and Emma Smith claim that Middleton was co-author of *All’s Well* especially in terms of ‘orthographical preferences’.79 However, Vickers and Dahl do not support Middleton’s claims to co-authorship in *All’s Well*. Dahl further argues that ‘there appears to be substantial other evidence to confirm the original whole ascription to Shakespeare, thus the onus of proof for Middleton’s hand must lie with the disintegrators’.80 On the other side of the argument, Gary Taylor believes that *Macbeth* was re-written or added to by Middleton, and argues that the evidence of casting and verbal parallels in *Macbeth* suggest that Middleton was the co-author.81 According to John Jowett, Middleton only introduced the songs into *Macbeth*, but Davenant extended Middleton’s songs by preserving the Hecate scenes and developing the play further towards becoming an operatic piece.82 This approach makes sense because Middleton wrote as freelance for the theatre companies, and during 1613-1621 wrote most of his plays for the King’s Men. Thus, once Middleton had introduced his Hecate scenes, and they were staged successfully by the King’s Men, this undoubtedly led the King’s Men to provide these additions to *Macbeth* through the assistance of the Blackfriars’ flying machinery and musical instruments. In short, the Middleton material in *Macbeth* can be considered as a result of later revision, not of the original composition.83

*Macbeth*’s witches are not the only evidence that witches did not fly in the earliest texts and only did so after Davenant’s adaptation of the play. The *Late Lancashire Witches* is another example which shows that its witches did not fly from the beginning, but later were made to fly after being refashioned by Shadwell. In *The Late Lancashire Witches*, it is important to consider the stage direction of the scenes when the witches fly over the stage and summon the devil, which is the most spectacular feature of this play.

The Three Sisters in *Macbeth*
9. The Late Lancashire Witches

As in the other plays mentioned above, Thomas Heywood and Richard Brome's *The Late Lancashire Witches* (1634) also exploited public interest as well as the dramatists’ interest in the controversial subject of witchcraft. This play was first performed by the King's Men at the Globe in 1634. Before I come to the discussion of authorship, I would like to consider the source of this play. To capitalise on a current public affair, Heywood and Brome drew the source of their play from the court documents of a trial of 1612 in which twelve people from the Pendle Hill area of Lancashire were condemned to death for practising witchcraft on the Lancashire moors. Another trial in London in 1633 involved certain women from Lancashire who had been tried for witchcraft and were sent to London to be imprisoned. Some scenes in this play are about the depositions between witnesses and defendants in the case.85

Seventeen women were found guilty of witchcraft and four of them were sent to London, Margaret Johnson, Mary Spencer, Frances Dicconson and Jennet Hargreaves. These four women were arrested and accused of witchcraft in Lancashire on 24 March 1634 along with sixteen other women. The main four witches in the play are Mall (Mary Spencer), Gilian (Frances Dicconson), Meg (Granny Johnson) and Mawd (Jennet Hargraves). In the main plot of *The Late Lancashire Witches*, Mr. Generous finds out that his wife, Mrs. Generous, is the leader of some witches. After she transforms herself into the shape of a cat, she is then arrested and brought to justice by her husband. In Act two, in order to get Squire Generous’s favourite wine, Mall takes Robin (Generous’s servant) to London on a magic steed. Mall is known to be a witch as she bewitches a pail and makes it move of its own accord. In Act three, the witch-infested wedding of both Seely’s servants, Lawrence and Parnell takes place at Seely’s house. Squire Generous rebukes Robin for lying that he gets his wine from London. Then, Squire Generous tells Robinson (Miller’s son) not to allow his wife to use the gelding again. As a result of refusing her the gelding, she then changes him into a horse and rides him to the witch banquet.86

---

84 At this trial, Alice Nutter was found guilty with some others and is source for the character Mrs. Generous in the play. However, the boy, the witches and the incidents concerning witchcraft belong to the trial of 1634.

87 Heywood, Thomas and Brome, Richard, *The Late Lancashire Witches: A Well Received Comedy* (London, 1634), no page number is given.
the play was written, and more than a suspicion of the bona fides of the two chief witnesses for the prosecution’. 88 It is not my aim in this part of the chapter investigate all of the play’s scenes. Instead, I will focus on the witch scenes and especially their theatrical effects of flying on stage after being revised by the scribe. The main plots are assigned to Heywood’s authorship and the sub-plots to Brome’s. In general, after the play was revised, some scenes have been interpolated while some of them were omitted. 89 My focus will be more on when the witches of The Late Lancashire Witches started flying on stage.

10. The Co-Authorship of Heywood and Brome in The Late Lancashire Witches and the Stage Directions of the Witches

According to the title page, The Late Lancashire Witches was ‘a well received Comedy, lately acted at the Globe on the Bank-side by the King’s Majesties actors, written by Thom. Heywood and Richard Brome’. 90 In Act 6, scene 1, Generous gestures to the summer weather when he remarks that: ‘to sunder beds; but most in these hot months/ June, July August, so we did last night’. 91 Heywood was an actor in the Queen’s Company and wrote plays for the same company in 1634. 92 He then transferred his service to work for the King’s Men when he was writing The Late Lancashire Witches in 1634. 93

It has been argued that the play was written by Heywood, but was revised by Brome. Andrews makes the important point that as well as adding and introducing some new scenes, Brome also changed the names of the witches and spirits throughout the play, and also added the prologue and epilogue and probably the song for Act two. 94 However, Martin concludes that the play was written in 1634 and was a collaboration by both authors. However, Martin fails to account for the time when the play was produced and the time when Heywood was active in his career with the Queen’s Company. Andrews argues persuasively against collaboration in revision by referring to the proof that Heywood was still writing for the Queen’s Company in 1633 when The Late Lancashire Witches was produced by the King’s Men, the company for which Brome was writing in 1633-1634. In short, Andrews denies that the scenes assigned to Brome are based directly on the witch trial that occurred in 1633. Therefore, the witch scenes might probably belong to Heywood rather than Brome. Cromwell succinctly states that Heywood in all likelihood wrote the witch scenes but Brome may have composed the songs. 95 Stern shows that Brome had signed an agreement with ‘Queen Henrietta’s Men in July 1635 to come up with prologues, epilogues, revised scenes and songs for revivals, so will naturally have thought of all such sections as discrete entities anyway’. 96 Brome altered and interpolated some scenes in The Late Lancashire Witches but made no changes to stage directions when the witches enter and exit the stage. The stage direction, in The Late Lancashire Witches by Heywood and Brome, in (Act 2, scene 1) is:

Enter 4, V'witches: (Severally.)

(The Late Lancashire Witches) 97

Again the witches simply enter, but do not fly in Act 4, scene 1, where the stage direction reads:

Enter all the Witches and Mal, at several dores.

‘Several dores’ can be taken as good evidence of the precise manner in which the witches are directed to ‘enter’: the witches simply walk onto the stage at the Globe. All the supernatural characters, such as witches, Spirits, Mrs. Generous and Mall again enter and do not fly (Act 5, scene 1):

Enter Mrs. Generous, Mall, all the 'Witches and their Spirits (at several dores.)

Heywood and Brome’s witches do not fly; their feet are firmly on the ground in all the scenes. Although the witches here transform their familiars into horses in order to transport them to the Sabbath feast, it seems that Robin and Robinson do not actually ride as no stage directions call for their riding. They simply enter through several doors. The writers may have intended to denote flying through the words of the conversation between Moll and Robin, and Mrs. Generous and Robinson, rather than flying machinery. However, the stage directions of the witches in some scenes read ‘fly’ when the play was refashioned and altered by Thomas Shadwell 1681.

89 The discussion of this has been analyzed in both articles by C. E. Andrews, ‘The Authorship of Lancashire Witches’, and Robert Grant Martin, ‘Is “The Late Lancashire Witches” a Revision?’.
93 Martin Robert Grant, ‘Is “The Late Lancashire Witches” a Revision?’, p. 263. See also Cromwell, Thomas Heywood: A Study in The Elizabethan Drama of Everyday Life, p. 27.
95 Cromwell, Thomas Heywood, p. 184.
97 Thomas Heywood and Richard Brome, The Late Lancashire Witches (1634). The stage direction is the same in Thomas Heywood and Richard Brome: The late Lancashire V'witches. A well received Comedy, lately Acted at the Globe on the Bank-side, by the Kings Majesties Actors (London, 1634)
11. Stage Directions in Thomas Shadwell’s The Lancashire Witches, and Tegue O Divelly the Irish-Priest

The Lancashire Witches, by Thomas Shadwell, was very probably sourced from Heywood and Brome’s The Late Lancashire Witches. Shadwell’s The Lancashire Witches was first performed in 1681 and published in 1682. Marsden argues that the political comedy of Shadwell’s The Lancashire Witches combines ‘a conventional romantic comedy with virulent anti-Catholic satire, setting a group of energetic witches against an idiotic Irish priest and the foolish neighbours who support him’. Shadwell imitated William Davenant when he successfully altered Macbeth by adding new scenes, machines for making witches fly and new clothes for the actors. Shadwell also wanted to introduce similar theatrical effects in The Lancashire Witches for the Bank-side or Blackfriars audience. One of the special theatrical spectacles of this play is the scene in which the witches fly over the stage and summon the devil. Shadwell in his preface to The Lancashire Witches says:

The bounds being then so narrow, I saw there was no scope for the writing of an intire Comedy (wherein the Poet must as a relish of the present time;) and therefore I resolved to make as good as entertainment as I could, without tying myself up to the strict rules of Comedy; which was the Reason of my introducing of Witches.100

Through his preface, Shadwell admits that his comedy was influenced by operatic spectacle and the reason for his introducing of the witches was to make the play as entertaining spectacle as he could. This is similar to the late seventeenth century performance of Macbeth when Downes records that Macbeth was performed with ‘new Cloath’s, new Scenes, Machines, as flyings for the Witches; with all the Singing and Dancing’.101 Shadwell borrowed various incidents from the earlier play by Heywood and Brome, but he also refashioned the witch scenes in order to entertain the audience by giving a new theatrical twist to the old play. Shadwell’s Mother Demdike, who resembles the Dame in The Masque of Queens, belongs to 1612. However, the other individuals, such as Goody Dickson, Mal Spencer, Mother Hargrave and Meg belong to the alleged witches who were accused of sorcery in 1633. There is evidence in the play that Clod is magically flown into a tree-top and the performance of the aerial power of the witches is celebrated in the following songs:

This shows that the witches ‘fly’ to the sky accompanied with the effect of thunder and lightning. The witches are in the heavens and rule in the air. The physical power of the witches is manifested in their ability to ‘fly’, which they practice as a seductive fantasy when they ride to the Sabbath on their brooms. Downes describes Shadwell’s The Lancashire Witches, acted in the autumn of 1681 at Dorset Gardens, as a kind of Opera, having several Machines of Flyings for the Witches, and other Diverting Contrivances in’t: All being well perform’d, it prov’d beyond Expectations; very Beneficial to the Poet and Actors.103

The flight of the witches and the new songs give a theatrical experience for the audience equivalent to that of the revived Macbeth. Records of performances of The Lancashire Witches in the seventeenth century are plentiful. There were advertisements for a number of performances of the same play which focused on the entertainment of the witches and their visual spectacle, for instance, on 10th August 1704 at Drury Lane.104 On 1st July 1707, The Lancashire Witches was performed with Bullock as Tegue O’Divelly at the Haymarket by the Summer Company, and the same performance was repeated on 25 July and announced as ‘acted there but thrice; with all the risings, sinkings and flyings of the Witches, as they were originally performed’.106 This kind of advertisement title assured playgoers that the play would be staged with these supernatural spectacles as a prominent feature, further evidence that Restoration playgoers were interested in operatic spectacles and magical shows. Summers also gives various dates for performing The Lancashire Witches: on 29th October 1707 at the same theatre and on 2nd June 1708 at Drury Lane by the Summer Company (but no cast recorded). It was performed on 2nd and 3rd August 1711, as recorded in The Spectator, at the Theatre Royal in Drury Lane by the Majesty’s Company which was carefully

103 Downes, Roscius Anglicanus, pp. 80-81. See also Lily B. Campbell, Scenes and Machines on the English Stage during the Renaissance: A Classical Revival (Cambridge: Cambridge University Press, 1923), p. 266.
105 Ibid., p. 373.
revised: “with all the original decorations of scenes, Dances, and Musick; the Witches Songs being all new set, and new Dances compos’d proper for the Occasion”. It was again advertised in *The Spectator* that Shadwell’s *The Lancashire Witches* would be performed on 26th May 1712, this time it advertises ‘the original Decorations of Scenes, Dances, Risings, Sinkings, and Flying of the Witches’ with both musical songs and instrumental music. 108 This advertisement here promised its viewers that the play would be staged with some new spectacles featuring the witches. Stage machinery in Restoration theatres was an area of intense competition in performance of these witch plays. This is because Restoration spectators were more intrigued by the startling new effects made possible by advanced technology. The play was also performed on 4th July 1723, at the benefit for Widow Bowen and Widow Leigh.109 It was performed on 13th May 1724 at the benefit of Chetwood Prompter, 110 and its last recorded performance was on 30th October 1727.111 During one performance of the witches in flight, Summers states that, an ‘accident happened, because of the ignorance of the workers in the machinery, the Fly broke, and Mr. Morgan (who flies on the back of the witch) with a Witch fell together but neither of them were much hurt’.112 This evidence suggests then that the flight of witches was not easy to achieve on stage, and this may be the reason that some dramatists, such as Heywood and Brome, did not rely on technology to perform their miraculous and supernatural scenes, or there may not have been sufficiently advanced technology at the second Globe for staging these magical spectacles. These reasons might account for the fact that these writers do not use stage directions for the descent and ascent scenes.

The stage directions of the witches and the names of the supernatural characters in Shadwell’s *The Lancashire Witches* are different from Heywood and Brome’s. In the first song the witches fly away laughing in thunder and lightining (I.i):

*One of the Witches flies away with the Candle and Lanthorn, Mother Donald is at the top of a Tree, and they all fly away Laughing.*

In the songs of Act 2, the witches fly over the stage and summon the devil, which is the most spectacular scene in this play. The witches seem to enjoy their flight when they mount into the sky, recalling Hecatian songs in both *The Witch* and the revised *Macbeth*. They all sink and vanish after they dance and sing:

**On our Brooms we can fly, And unimply mounting to the Sky,**

**Here a health to our Master the Prince of the Fists, Who commands from Center all up to the Skies.**

(Shadwell, *The Lancashire Witches*, 26)

They do not only fly when they sing but Moll Spencer bridles Clod and then flies away with him to Madge’s invitation. The horse here is Clod whom Moll Spencer asks to carry her where she wants (Act 3):

*Horse, horse, see thou be, And Where I point thee carry me.*

(Shadwell, *The Lancashire Witches*, 40)

This extract is very similar to the charm written by Heywood when Robin refuses to get the grey gelding for Mrs. Generous. In response, Mrs. Generous immediately bridles Robin and drives him to the meeting of the witches: *Horse, horse, see thou be, And Where I point thee carry me.*

(Shadwell, *The Lancashire Witches*, 56)

Again at the end of the play, the Spirits also fly when the servants enter the stage with candles (Act 5):

*Their men taking up the Candles, the Spirits fly away with ’em.*

(Shadwell, *The Lancashire Witches*, 65)

There are many new stage directions in the play by Shadwell which cannot be found in *The Late Lancashire*

112 Ibid., p. 96.
Witches by Heywood and Brome. It is obvious that Shadwell takes most of the incidents of the play from Heywood and Brome. However, he can be considered as sole author of the new stage directions he provided in the witch scenes. The play was performed at the Blackfriars once it was refashioned and revised by Shadwell, and like Davenant’s Macbeth, it deals more with the vulgar and farcical aspects of witchcraft.

During the time that Heywood and Brome’s The Late Lancashire Witches was written, witchcraft mania was increasing and some witch-hunts and hangings occurred in English history. In contrast, by the time that Shadwell’s The Lancashire Witches was performed, belief in witchcraft was fading and witches were more in vogue as a source of satire. In spite of this, the witches in both The Late Lancashire Witches and Shadwell’s The Lancashire Witches with Tegue are a part of comic relief in the plays because they feast, dance and sing, banquet, and transform humans into animals. The writers treat witchcraft intolerantly, as all of the witches are executed by the end of each plays. Witchcraft is then depicted here in a comedic way, even as it was taken seriously by others in the period. As in Middleton’s The Witch, witchcraft here permeates the whole play and it is not a minor part of the plot. The Late Lancashire Witches was performed eighteen years after Middleton’s The Witch by the same company, the King’s Men. Unlike the classical witches of The Witch, Sophonisba and Macbeth, The Late Lancashire Witches like The Witch of Edmonton is about English and contemporary witchcraft belief as its source is drawn from trial records. The stage direction of ‘thunder and lightning’ does not accompany Hecate’s entrances, as this theatrical effect is designed to evoke the feeling of horror and fear; Middleton’s witches are comical and carnivalesque. Similarly, no ‘thunder and lightning’ effect accompanies the entrances of the witches of The Late Lancashire Witches. Again, this is because both plays are designed not to frighten the audience, but to present witches as entertaining, part of a fantasy world. Their activities are similar to those found in The Witch: Middleton’s witches are able to cause impotence, indulge in feasting and dancing, and transform themselves and their familiars into different animals. Unlike Middleton’s The Witch, the witches of The Late Lancashire Witches do not make spells out of magical ingredients, and do not have control over the weather. Similarly to Middleton and Shakespeare’s Hecate, Mother Sawyer, Doctor Faustus and Erichtho, the witches of Heywood and Brome have familiars in order to transport them to their Sabbath feast and in return they allow their familiars to suck their blood. A coven here is also dramatized in which the witches fulfil their desires.

Unlike the witches of all the other witch plays, the witches of Heywood and Brome have second identities: Mrs. Generous has a husband and Moll Spencer is a sweetheart to Robin. Another example, Master Doughty falls in love with one of the witches during his searches for them, after they had made trouble at the wedding feast. Besides this, the witches here are not portrayed as old women; on the contrary, the witches are young and sexually attractive. For instance, Whetston blames those who bully him for the claim that his mother is a witch:

WHETSTONE. I doe not say as Witches goe now a dayes, for they  
for the most part are ugly old Beldams, but she was a lusty
young Lasse, and by her owne report, by her beauty and faire
lookes bewitcht my Father. (I.1)

This context shows that Whetstone’s mother is not old like Middleton’s Hecate, Mother Sawyer, Mother Bombie and the Wise Woman of Hogsdon. Her beauty can seduce men. This young witch figure is used here to replace the old hags and beldams like those in the plays mentioned here. Not only is Whetstone’s mother young, but Moll Spencer also has a lusty appearance; like Mrs. Generous, she also seduces Robin. Beauty as a feminine power here is used to abuse men and control their power. The witches also do not commit infanticide or terrorize their neighbours and relatives, but they are busy feasting and conducting their rituals. One can say that a new theme of hunting occurs here when the witches hunt the adults and make their familiars transport them for their Sabbath feast. The idea of transporting witches from one place to another is mentioned in Chapter Four. Some contemporary sources believe that the witches’ soul is transported from one place to another whereas others believe that their soul and body together are transported from one place to another. The witches of this play have the ability to transform themselves and their familiars into animals and make them subservient to themselves socially and sexually. In other words, the witches have dominant power to subdue men and make them obedient to their orders. This created the possibility for a very effective and entertaining spectacle, designed to inspire laughter and amusement in the audience. Stage directions in some scenes call for music through which the witches begin to dance:

Musicke selengers round
As they begin to daunce, they play another tune, then fall into many (I.1)

Again they are dancing and entertaining with music before the banqueting takes place. In other words, witchcraft and comedy again come together, although the witches cannot survive by the end of the play. Shadwell’s witches appear more comic than Heywood and Brome’s as his witches also fly off the stage with their familiars.

In conclusion, this paper has shown how witchcraft became part of the theatrical spectacle in Restoration versions of two early seventeenth-century plays, and this has wider implications for how drama was transformed at a more general level during this period into a more spectacular medium. Furthermore, these comparisons show
how Davenant and Shadwell adapted the original texts of *Macbeth* and *The Late Lancashire Witches* especially the witch scenes for the purpose of satire and to meet the tastes of the audience of Blackfriars. The two revised plays offered a more ambitious spectacle than the original ones, and this study has shown that Restoration audiences were more interested in the comic effect of the witch scenes. By the time the two plays were revised, belief in witchcraft was dwindling, and dramatists attempted to make the staging of flight as eye-catching as possible through advanced technology in order to present the flight of the witches in a comical and highly entertaining manner. Besides being comic and theatrical, the witches of the plays mentioned here evoke through the community of young, powerful, sexually-attractive witches anxieties associated with feminine power, the subservience of men and lack of independence. As well as being comical, these witches could also manipulate men through the power of their sexual relations.
